Kenya Certificate of Primary Education

## HOBIES

Chess

Football

## ABOUT ME

I am a motivated and detail-oriented student currently pursuing a Bachelor's degree in Information Technology. I am passionate about technology and its role in solving real-world problems. With a strong foundation in programming, systems analysis, and data management, I am eager to apply my academic knowledge in a professional setting. I am dedicated to continuous learning and development, with an interest in exploring various areas of IT, including software development, network administration, and cybersecurity.

## EXPERIENCE

### • **Asset Management System 2024**

In a group of four, we developed a standalone system for Kaimosi Friends University for maintaining and tracing the assets that enters, leaves or are around the university premises. The system is in my github page.

### • **Industrial Training May 13th - July 15th 2024**

System Administration

Installation of servers (ubuntu server and windows server)

Crimping of ethernet cables and installation of ethernet ports

Configuration of switches, routers and servers using packet tracer

### • **Industrial Attachment May 5<sup>th</sup> - 1<sup>st</sup> August 2024**

IT Intern - University of Eastern Africa, Baraton

- Configured and managed network switches for campus LAN infrastructure.
- Performed routine maintenance of computers, including hardware checks, software installation, and virus removal.
- Provided technical support to staff and students, resolving hardware, software, and peripheral issues.
- Assisted in asset inventory management and maintained documentation for IT procedures and support logs.
